

translation Core Mobile - Initial Inception

19 aug 2026 (BAS)

Context: Mukata training workshop #2

- No "pencil + paper" for oral communicators → functional need
- NW needs presence in OBT context → strategic need

for NW NB:

DESIGN CRITERIA (PHASE 1)

- oral communities need a **turnkey simple** audio recorder/editor
 - standalone, mobile (Android + iOS), offline, oral
- visual **interface** - low/no text (icon driven - "World's Simplest Mobile Audio Notebook/Editor")
- **functions** - record passage, edit recording, manage sections of a recording, export to MP3
- **waveform editing** (VI)
 - playback marker
 - edit marker
 - paste
 - edit window - cut
 - insert (schema)
- flexible + consistent **structure** for recordings
 - (A) - Book = Collection of Chapters (Resource? Collection? Project?)
 - (1) L Chapter = Collection of Sections (Stories, pericopes) - ordered
 - (a) L Segment = Contiguous speech unit (frames, spans/verses)
 - (1) L Takes
- **section-by-section** (UX) vert scroll - OBS frames, Bible pericope
 - granular to section, editing, re-recording
- **export** recording to MP3 - concatenation of sections

the work happens here

by B-C-S

PHASE 2+

- iterative (re)publishing w/ versioning
- attach notes/comments (audio) w/ export
- import/export other formats (Render, Shema, etc.)
